Release 1.0

youben11

Nov 23, 2018

Contents:

1	Introduction	1
1.1	What is OpenClass?	1
2	Models	3
2.1	Workshop	3
3	Indices and tables	7
	Python Module Index	9

CHAPTER 1

Introduction

1.1 What is OpenClass?

OpenClass is a web app that promote information sharing through organized workshops.

2.1 Workshop

```
class openclass.models.Workshop
  description

  MAX_LEN_TITLE
    description

  MAX_LEN_LOCATION
    description

  INFINITE_SEATS_NB
    description

  POL_FIFO
    description

  POL_MANUAL
    description

  POLITIC_CHOICES
    description

  PENDING
    description

  ACCEPTED
    description

  REFUSED
    description

  DONE
    description

  CANCELED
    description
```

STATUS_CHOICES
description

DEFAULT_PHOTO
description

registered
description

mc_questions
description

animator
description

topics
description

decision_author
description

title
description

description
description

required_materials
description

objectives
description

requirements
description

seats_number
description

submission_date
description

decision_date
description

start_date
description

duration
description

registration_politic
description

location
description

cover_img
description

status
description

end_date()
description
Returns description
Return type datetime

count_registration()
description
Returns description
Return type int

register(*profile*)
description
Parameters **profile** (*Profile*) – description
Returns description
Return type bool

is_registration_open()
description
Returns description
Return type bool

last_registration_date()
description
Returns description
Return type datetime

cancel_registration(*profile*)
description
Parameters **profile** (*Profile*) – description
Returns description
Return type bool

last_cancel_date()
description
Returns description
Return type datetime

accept(*profile*)
description
Parameters **profile** (*Profile*) – description
Returns description
Return type bool

refuse(*profile*)
description
Parameters **profile** (*Profile*) – description
Returns description

Return type bool

done()

description

Returns description

Return type bool

is_accepted()

description

Returns description

Return type bool

days_left()

description

Returns description

Return type int

check_registration()

description

Returns description

Return type dict

is_now()

description

Returns description

Return type bool

CHAPTER 3

Indices and tables

- `genindex`
- `modindex`
- `search`

O

`openclass.models`, 3

A

accept() (openclass.models.Workshop method), 5
ACCEPTED (openclass.models.Workshop attribute), 3
animator (openclass.models.Workshop attribute), 4

C

cancel_registration() (openclass.models.Workshop method), 5
CANCELED (openclass.models.Workshop attribute), 3
check_registration() (openclass.models.Workshop method), 6
count_registration() (openclass.models.Workshop method), 5
cover_img (openclass.models.Workshop attribute), 4

D

days_left() (openclass.models.Workshop method), 6
decision_author (openclass.models.Workshop attribute), 4
decision_date (openclass.models.Workshop attribute), 4
DEFAULT_PHOTO (openclass.models.Workshop attribute), 4
description (openclass.models.Workshop attribute), 4
DONE (openclass.models.Workshop attribute), 3
done() (openclass.models.Workshop method), 6
duration (openclass.models.Workshop attribute), 4

E

end_date() (openclass.models.Workshop method), 4

I

INFINITE_SEATS_NB (openclass.models.Workshop attribute), 3
is_accepted() (openclass.models.Workshop method), 6
is_now() (openclass.models.Workshop method), 6
is_registration_open() (openclass.models.Workshop method), 5

L

last_cancel_date() (openclass.models.Workshop method), 5
last_registration_date() (openclass.models.Workshop method), 5
location (openclass.models.Workshop attribute), 4

M

MAX_LEN_LOCATION (openclass.models.Workshop attribute), 3
MAX_LEN_TITLE (openclass.models.Workshop attribute), 3
mc_questions (openclass.models.Workshop attribute), 4

O

objectives (openclass.models.Workshop attribute), 4
openclass.models (module), 3

P

PENDING (openclass.models.Workshop attribute), 3
POL_FIFO (openclass.models.Workshop attribute), 3
POL_MANUAL (openclass.models.Workshop attribute), 3
POLITIC_CHOICES (openclass.models.Workshop attribute), 3

R

refuse() (openclass.models.Workshop method), 5
REFUSED (openclass.models.Workshop attribute), 3
register() (openclass.models.Workshop method), 5
registered (openclass.models.Workshop attribute), 4
registration_politic (openclass.models.Workshop attribute), 4
required_materials (openclass.models.Workshop attribute), 4
requirements (openclass.models.Workshop attribute), 4

S

seats_number (openclass.models.Workshop attribute), 4

start_date (openclass.models.Workshop attribute), 4
status (openclass.models.Workshop attribute), 4
STATUS_CHOICES (openclass.models.Workshop
attribute), 3
submission_date (openclass.models.Workshop attribute),
4

T

title (openclass.models.Workshop attribute), 4
topics (openclass.models.Workshop attribute), 4

W

Workshop (class in openclass.models), 3
